

19" Wall Mounted Racks

Signamax wall mounted racks, both ventilated and unventilated, are data cabinets suitable for installing small-sized structured cabling systems. Their front door is mounted using two hinges and secured by 1-point lock. Safety glass used in the door assembly provides very high safety. These Signamax racks can be mounted upside-down, enabling the door to be opened from the left or right. There are openings in the back of the rack which enable mounting the cabinet onto the wall. The ceiling and the bottom of these Signamax racks are equipped with cable entries. The center section of the 500 mm racks can be unlocked separately. The maximum load is 35 kg.

RECW and RECW-UV 19" Wall Mounted Racks RAL 7035
