

2-Port Compact KVM Switch

Signamax Connectivity Systems' CommandView is the perfect solution for convenient control of two computers from just one keyboard, monitor, and mouse. Quick, simple connection and you're in total control. No software required; completely plug & play. Select any computer with push-button ease. Auto Scan at user selectable intervals. Dedicated keyboard & mouse emulation. Intelligent mode operation ensures each keyboard's LED status & typematic rates are automatically restored.
