Solarix RJ11, RJ12, and RJ45 plugs are reliable components that are designed to ensure excellent connection between the gold plated contacts of the plug and copper wires of data cables. These connectors are available for different cable types and wires, both stranded and solid. The Solarix RJ45 Category 5E, Category 6, and Category 6A connector contacts are covered with 50 µin of gold and they are available in both shielded and unshielded versions. The gold-plating of the RJ11 and RJ12 plugs is 15 µin and these connectors are designed primarily for phone accessories.
